or 6883-2171

When

Classes run every Saturday (except during school and public holidays). Weekday classes are scheduled upon request.

The LogicMills® method was developed by university professors and trained teaching professionals to equip our students with the skills to help them develop into strong, independent thinkers.

We draw out students' natural curiosity while teaching systematic, problem-solving techniques by engaging them in a fun, experiential learning process that is unique to our programme. Our method has been proven to successfully improve rates of learning, as well as grades across all academic subjects. We invite you to contact us to find out more.

LogicMills Kindy™

ages 4 - 6

We introduce the fundamentals of analytical thinking including logical reasoning, simple deduction and cost-benefit analysis. This prelude to the ATS® course is an exceptionally fun, activity-based programme that builds a strong foundation for your child's journey toward good thinking.

Your child will

- * **Build** creative and critical thinking skills
- * **Develop** fundamental reasoning tools
- * **Improve** in focus and concentration
- * **Learn** to work and play well in a group
- * **Strengthen** their oral communication

Young Thinkers ATS®

ages 7 - 16

The Young Thinkers ATS® course equips students to deal with challenges at school and in life. Students are motivated and engaged in game-based sessions that are set in an interactive and creative environment. The comprehensive basket of skills and abilities that students pick up include logical reasoning, critical thinking, communication skills, strategic thinking and linguistic capability.

Your child will

- * **Think** independently
- * **Acquire** higher order thinking and problem-solving skills
- * **Enhance** their oral skills and written communication
- * **Develop** better decision-making abilities and the confidence to speak their minds
- * **Improve** memory retention

The Thinkery®

ages 7 - 16

This is our LogicMills Think Tank. A fun, stress-free arena where graduates of our ATS® course can form a community of like-minded learners, as well as upkeep their thinking skills and play a pivotal role in LogicMills' R&D.

Holiday Programmes

ages 4 - 12

These are typically run during the June and December holidays. We unabashedly pack these one- to two-day workshops with exciting games and activities, all of which focus on introducing a sampling of the thinking techniques that are covered in our regular enrichment.

The HAVIT® Method

Honing Language Skills

Clarity of expression and precision of understanding

Acts of mind

Consideration and interpretation of actions, intentions, context

Varying between abstract & concrete

Understanding connections between concrete examples and their underlying principles

Inferences
